Troubleshooting Tips

- Passwords are case-sensitive, and should be 4-50 characters in length. At least one number, and one letter are required. Symbols are accepted, but are not required.
- Turn-off the pop-up blocker.
- Ensure all required fields are completed. Required fields are indicated with red text.
- Make sure you only have one window or tab open that is signed into My JAC. Problems can occur if you are signed into multiple instances.
